Educational Background

Zero to Mastery

Zero to Mastery (UI/UX Product Design) | Completed May 2025

- Covered UX principles, system flows, user needs analysis, and low-fidelity wireframing.

W3Schools

W3Schools (Web Design) | Completed Jan 2025

- Supported interface structuring, responsive layout, and component fundamentals.

Rockland High School

Diploma | Aug 2011 - May 2014

Who Am I?

Product Designer focused on creating clear, structured, and frustration-free interfaces. I approach design by understanding user constraints, system behavior, and the logic beneath a flow — ensuring that digital experiences feel intuitive, predictable, and easy to navigate. With a foundation in HTML/CSS, strong user empathy, and hands-on project work, I aim to build products that reduce cognitive load and empower users to complete tasks with confidence.

Career Experience

Target Corporation

Guest Advocate | Aug 2025 – Sep 2025

Delivered strong user-facing support by identifying needs, resolving issues quickly, and maintaining attention to detail—skills directly transferable to clear UX decision-making and understanding real user frustrations.

Walgreens Corporation

Customer Service Associate | Oct 2024 – Jan 2025

Built customer empathy through daily interactions, improved problem-solving speed, and supported engagement through clear communication — core foundations for user-centered design.

Project Work

TENNAJAM

Product design case-study | WIP

Designed an end-to-end hosting experience for non-technical and semi-technical users, focusing on flow clarity, structured decision-making, and reduced cognitive load.

Highlights:

- Defined setup and management flows
- Created wireframes for hosting, server details, and management overview
- Simplified complex technical concepts into approachable steps
- Documented reasoning, trade-offs, and IA decisions

QUILLTY

Personal project | WIP

Explored layout structure, hierarchy, readability, and user workflows for a distraction-reduced writing tool.

Skills

- **UX / Interaction Design**
 - User flows & journey mapping
 - Wireframing (low-fi)
 - Information architecture
 - Interaction logic & behavior modeling
 - Accessibility awareness
 - Usability problem-solving
- **UI / Visual Structure**
 - Layout systems
 - Hierarchy & spacing
 - Responsive and consistent interface patterns
 - Calm, readable, structured design
- **Technical**
 - HTML, CSS, Bootstrap
(Foundational–Intermediate)
 - Front-end alignment
 - Understanding of responsive system behavior
- **Soft Skills**
 - Clear communicator
 - Detail-oriented
 - Highly empathetic toward user pain points
 - Fast learner & iterative thinker
 - Calm under pressure

Did you know?

Jack once spent nearly 30 days eating just tomato soup after oral surgery — a small story of commitment and perseverance that still applies to how he learns and grows.
